

Pipe Spring National Monument

Facilities Management Intern.

The intern will work under the supervision of craftsmen in the Maintenance Department and perform a variety of maintenance related tasks. Duties will include assisting in historic preservation projects and carpentry projects such as the repair and repainting of historic structures, wagons, fences and other cultural landscape features; grounds maintenance (mowing grass, pruning, trimming, raking and weeding), livestock care (feeding, cleaning corrals and chicken coop), and assisting in minor repairs to utility systems and public buildings. Internships will also include introduction to computer based maintenance management systems. Most work will be performed outside in a range of temperatures and weather conditions.
